

Performance you can trust

At Blueair, we have a clear vision of clean air for everyone. It guides us in everything we do, including the products we make.

The Classic is Blueair's most iconic range of air purifiers. The patented HEPASilent™ technology is at the heart of the Blueair Classic as it efficiently cleans the air of your home while making no more sound than a whisper.

Its build is made up of high quality steel, making it a product that is sure to last for many years to come.

To get the full Classic experience, make sure to download the **Blueair Friend app** and you will be able to connect and control your air purifier from wherever you are.

Classic 205

Intelligent air purifier

HEPASilent™ Technology

Higher airflow efficiency, lower noise and energy consumption, so we all can breathe easy.

Best-in-class filtration for every need

Blueair air purifiers use a revolutionary combination of the best in electrostatic and mechanical filtration. The HEPASilent™ technology removes 99.97% of harmful particles from the air, down to 0.1 micron in size.

- The Highly efficient particle filtration is combined with activated carbon filtration media to remove gaseous pollutants.
- Minimal energy consumption
- Less dense filter media, which means lower noise levels

Best clean air delivery rate

Air changes per hour
Cleans air in every 12 minutes/hour

Other models may be available in different markets. Please consult your authorized Blueair distributor for more information. Preliminary figures to be verified by a third-party test institute.

^A Specifications based on U.S. models (120 VAC, 60 Hz with particle filter).

^B The CADR indicates how much filtered air is delivered (airflow) by the air purifier operating at the highest setting, and how well the system removes tobacco smoke, dust and pollen pollutants from the air (efficiency). Tests are performed in accordance with ANSI/AHAM AC-1.

^C Air change per hour is calculated on the recommended room size, assuming 2.4 m ceiling. The air change rate per hour will increase for smaller rooms.

Blueair Classic SmokeStop Filter

Removes pollutants such as:

Performance you can trust

Studies show that children's lungs and brains develop better with cleaner air. Just imagine what breathing better indoor air can do for allergy and asthma sufferers or for those with other respiratory problems.

- Ensure your family and friends breathe air that is 99.97% free of pollutants.
- Minimize triggers for people who have allergies, asthma and other respiratory illnesses.
- Cleans the air so that it is visibly different and dust free.

Blueair Classic 205 comes with integrated Wi-Fi which allows remote accessibility.

Compatible with Blueair Aware for indoor air quality monitoring.

Awards & Certifications

^D Recommended interval for filter replacement is 6 months if the air purifier is on 24/7.

^E Blueair units comply with quality, safety and regulatory requirements of the countries where they are sold. Blueair units comply with international standards, including the CE mark, S mark, CB Scheme and ETL Listed Mark. National standards are controlled by the distributors responsible for the market.
