

RossMax HA

Low foaming alkaline detergent, Highly effective for hard water

RossMax HA is a highly alkaline detergent for use in hard water, specially formulated to prevent tartar debris from last rinse. RossMax HA is very effective for the removal of most soils organic and prevents scale formation.

RossMax HA is used in food industries when a high alkalinity and an inhibition of scaling are necessary. RossMax HA can be used for a wide range of applications including CIP of brewing rooms, heat exchangers, pipes, fetchers and brewery feast.

RossMax HA can also be used for two-phase CIP cleaning in dairies and deep-fat fryers and cookers in the processed foods. RossMax HA is very effective in CIP for cooking and smoking cells, even in hard water and low spraying pressure, leaving the surfaces clean and without tartar.

Key Benefits

- Versatile product, can be used in many industries
- Perfectly suitable with automatic dosing systems
- Excellent Cost and Performance Optimization
- Prevention from scale building
- Simple application

Application Method

Use concentrations between 0.6-7% w/w (0.5-5% v/v) at temperatures ranging from 20 to 80 ° C depending on the type of application, degree of soiling and hardness of water, up to 140°C for UHT applications.

Product should be rinsed thoroughly after use, in order to remove all residues of surfaces in contact with foodstuffs. For more details, please contact your local Buzil Rossari representative.

RossMax HA

Low foaming alkaline detergent, Highly effective for hard water

Technical Data

Appearance	Clear pale-yellow liquid
pH Value	12.5 ±1
Density at 20°C	1.51
Chemical Oxygen Demand	14 gO ₂ /kg
Nitrogen	< 0.3 g/kg
Phosphorous	< 2.3 g/kg

Compatibility

Product can be used on most materials found in food industries if the product is applied according to concentration and temperature recommendations. It is recommended to carry out tests for other materials before prolonged use.

Storage & Handling

All safety information on the handling and use of this product is provided in the Safety Data Sheet which can be consulted and / or obtained from our representatives

Keep this product in the original packaging or, where possible, in a tank of bulk reception, protected from extreme temperatures.

Declaration: Technical figures given in this data sheet are typical values based on internal laboratory measurements, following appropriate International Standard Methods, and should not be taken as a warranty or representation. It is the end user's responsibility to make sure that the product matches its requirements.

For more information on this product, please contact your local Buzil Rossari representative.

RossMax HA

Low foaming alkaline detergent, Highly effective for hard water

Food Grade Quality Certificate

Application in food & beverage processing facilities

Here we confirm that, RossMax HA, if used according to the instructions in the product information sheet is suitable for the open plant cleaning in Beverage, Brewing, Dairy & Food Processing facilities and not to adulterate the product in any manner during the use.

Essential condition is a thorough rinsing with clear portable water of surfaces intended to get in direct contact with foodstuff.

The remaining residuals that may contaminate or adulterate food contacting cleaned surfaces are expected to be negligible, following a potable water rinse. Therefore, the potential ingestion of residues resulting from the approved use of these types of products does not represent a significant health hazard after our assessment of the products as suitable for use under the intended conditions.

Thanking you,

Yours faithfully,

For Rossari Biotech Ltd.

Please note that this is not a regulatory assessment and should not be construed as an endorsement of regulatory compliance.

Analytical Test Procedure/Method

Product	RossMax HA	Issued On	01/04/2018
Application	Low-foaming alkaline detergent with high efficiency for hard water	Next Review On	01/04/2023

Reagents

0.1N Hydrochloric acid or sulfuric acid, Phenolphthalein Indicator

Method

Add 2-3 drops of indicator to 10 ml of the solution to be dosed. Titrate with the acid until dis-colouration.

Calculation

%p/p RossMax HA = volume (mL) x 0.088

%v/v RossMax HA = volume (mL) x 0.059

1. Identification of the mixture and of the company / undertaking

1.1. Product identifier

RossMax HA

1.2. Relevant identified uses of the mixture and uses advised against

Professional cleaning/maintenance product for food & beverage industries.

1.3. Details of the supplier of the safety data sheet

Manufacturer:

Manufactured under licence from buzil
ROSSARI BIOTECH LIMITED
Plot No. 10 & 11, Survey No.90/1/10 & 90/1/11/1,
Kumbharwadi, Village Naroli
Silvassa-396235
Dadra and Nagar Haveli (UT)
India

2. Hazards identification

2.1. Classification of the mixture

H315: Skin irritation, category 2

H319: Eye irritation, category 2

2.2. Label elements (acc. to 1999/45/EC)

Risk phrases :

Hazards for man and the environment :

R 35 - Causes severe burns.

Classification system : The classification complies with current EC regulations on dangerous substances and preparations

2.3. Other hazards

The product does not contain substances which are classified as persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB) according to 1907/2006/EG annex XIII.

Foam formation after vomiting bears risk of suffocation.

3. Composition / information on ingredients

Chemical characterization

Description : Mixture in water of non-dangerous ingredients and substances listed below.

Hazardous ingredients :

MAJOR/HAZARDOUS INGREDIENTS NAME	CAS NUMBER	APPROX. PERCENTAGE
Sodium Hydroxide	1310-73-2	≥ 30%
Phosphonates (EC 89/542)		< 5%

MATERIAL SAFETY DATA SHEET

according to REGULATION (EU) No 453/2010, annex I

4. First aid measures

General information : Remove contaminated clothing immediately.

Inhalation : In case of unconsciousness bring patient in to stable position for transport.

Skin contact : Wash skin immediately and thoroughly with water. Remove contaminated clothing. Obtain medical attention if symptoms develop.

Eye contact : Wash immediately with copious amount of water and obtain medical attention.

Ingestion : Remove material from mouth. Drink 1-2 glasses of water (or milk) and obtain medical attention without delay.

5. Firefighting measures

Suitable extinguishing media: CO₂, extinguishing powder or water jet. Fight larger fires with water jet or alcohol resistant foam.

Protective equipment: No special measures required

6. Accidental release measures

Protection of personnel : Wear suitable protective clothing, gloves and eye/face protection.

Environmental precautions : Dilute with plenty of water.

Method of disposal : Use neutralizing agent. Absorb with liquid-binding material. Dispose of the collected material according to the regulations.

7. Handling and storage

Handling (see also sections 8 and 15):

Information for safe handling : Use common rules for working with chemicals.

Information about protection against explosions and fires : No special measures required.

Requirements for storage rooms and containers : According to local legislation.

Storage in one common storage facility : According to local legislation.

MATERIAL SAFETY DATA SHEET

according to REGULATION (EU) No 453/2010, annex I

RossMax HA

Date of issue: 08.06.2018

8. Exposure controls / personal protection

Additional information about design of technical systems : No further data; see section 7.

Components with limit values that require monitoring at the workplace :

1310-73-2 sodium hydroxide (30%)

WEL (Great Britain) Short-term value: 2 mg/m³

Additional information : The lists that were valid during the compilation were used as basis.

Personal Protection equipment :

General protective and hygienic measures :

Keep away from foodstuffs, beverages and food. Take off immediately all contaminated clothing. Wash hands during breaks and at the end of work. Avoid contact with the eyes and skin.

Breathing equipment : Personal protection is not normally required.

Protection of hands: Chemical resistant protective gloves made of butyl or nitrile rubber (EN 374 category III). In consultation with the supplier of protective gloves a different type of similar quality may be chosen.

Eye protection: Tightly fitting safety glasses

9. Physical and chemical properties

Appearance: Clear pale yellow Liquid

Odour: characteristic

pH-value(1%): 12.5 ± 1

Melting point / melting range: ND

Boiling point / boiling range: ND

Specific gravity (25 °C): 1.49gm/cm³

Solubility in / miscibility with water: Miscible in water

Viscosity (25 °C): ND

10. Stability and reactivity

Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications

Dangerous reactions: Reacts with acids

Hazardous decomposition products: No dangerous decomposition products.

11. Toxicological information

Acute toxicity :

LD50(Oral) : Based on the toxicological classification the LD50 (oral) is estimated to be 200-2000 mg/kg. This value is of no practical significance due to the corrosive nature of the product.

Primary irritant effect :

skin contact : Causes severe burns

eye contact : Causes severe or permanent damage.

inhalation : Severe irritant, may cause pulmonary oedema.

ingestion : Causes severe burns. Ingestion will lead to a strong caustic effect on mouth and throat and to the danger of perforation of esophagus and stomach.

Additional toxicological information: EC Classification: Corrosive

12. Ecological information

General Notes: Must not reach sewage water or drainage ditch undiluted or unneutralized. When used for its intended purpose this product should not cause adverse effects in the environment

13. Disposal considerations

Product Recommendation: Dispose of observing official regulations

European waste catalogue :

20 01 15 alkalines

Uncleaned Packagings Recommendation : Dispose of observing official regulations.

Recommended cleaning agent : Water, if necessary with cleaning agent.
