The Air Intelligence Module tests indoor air quality and automatically adjusts the speed setting based on your indoor air quality.

Use the optional Pro XL wall mount to free up floor space.

V-shaped filters for greater filtration capacity.

^I Specifications based on U.S. models (120 VAC, 60 Hz with particle filter).
^{II} The CADR indicates how much filtered air is delivered (airflow) by the air purifier operating at the highest setting, and how well the system removes tobacco smoke, dust and pollen pollutants from the air (efficiency). Tests are performed in accordance with ANSI/AHAM AC-1. The maximum possible CADR ratings according to this standard are: Tobacco Smoke: 450 cfm. / Dust: 400 cfm. / Pollen: 450 cfm.
^{III} Air change per hour is calculated on the recommended room size, assuming 8 foot (2.4 m) ceiling. The air change rate per hour will increase for smaller rooms.
^{IV} Recommended interval for filter replacement is 6 months.
^V Blueair units comply with quality, safety and regulatory requirements of the countries where they are sold. Blueair units comply with international standards, including the CE mark, S mark, CB Scheme and ETL Listed Mark. National standards are controlled by the distributors responsible for the market.

Blueair HEPASilent Technology

Higher airflow efficiency, lower noise and energy consumption, so we all can breathe easy

The ultra-silent fan draws air into the air purifier.

Airborne particles are electrically charged.

Charged particles are captured in the gradient filter.

Clean air is distributed into the room five times per hour.

Best-in-class filtration for every need

A revolutionary combination of the best in electrostatic and mechanical filtration, our air purifier replacement filters use HEPASilent® technology to remove 99.97% of harmful particles from the air, down to 0.1 micron in size.

- Highly efficient particle filtration can be combined with activated carbon filtration media to remove gaseous pollutants
- Saves energy with super low energy consumption
- Less dense filter media, which means lower noise levels
